About this course

Philosophy, Politics and Economics unites three disciplines that are foundational to public life and policy. Nowadays, anyone hoping to understand or advance in politics has to be proficient in economics, and an understanding of the philosophical underpinnings of the various political views that jostle on the public stage has long been recognised as hugely important.

Introduction

This degree provides the opportunity to master the overlap of these three disciplines, to come to grips with some of their specialisms, to attain a very thorough grounding in mathematical economics, and to develop skills in identifying and evaluating the principles and values that underlie debates. The combination is highly sought after by employers, who appreciate the breadth of knowledge and variety of skills that it provides.

Year one will comprise entirely of compulsory modules: four from Economics, and two each from Philosophy and Politics. In year two, you will take compulsory modules in Economics, one compulsory Philosophy module, and choose from a range of Philosophy and Politics options, which will give you some flexibility in the direction of your studies. For your final year, you will choose between a PPE-focused work placement or dissertation, and then optional modules from each of the three subjects.

Year in Industry

This programme can also be studied over four years, with the third year spent on a relevant, salaried work placement (UCAS code: L0V1). Visit the [BA Philosophy, Politics and Economics with a Year in Industry](#) course page for further information.

What you'll learn

- Advanced numeracy and literacy skills
- Creative, critical, and independent thinking
- Flexibility and adaptability
- Efficient time and information management
- The ability to organise and present a persuasive case
- The ability to devise and sustain arguments, and solve problems
- Systematic knowledge and critical understanding of key aspects of Philosophy, Politics and Economics

Teaching and assessment

How you'll learn

In studying Philosophy, you will learn how to defend your views with reasoned arguments, and to assess the arguments of others. Argumentative skills are learned through attending lectures and reading philosophical texts, developed by group seminar discussions, and formally assessed through essays and exams. You will complete modules to the value of 120 credits per year, from a wide range of options available. Most modules employ a blend of lectures, seminars, and online support materials. You will learn by reading and studying outside class time, by attending and participating in classes, by doing coursework and, for dissertations, via one-to-one meetings with a supervisor. There is also scope, both formally in the placement module and informally, for you to develop practical skills by volunteering.

How you're assessed

Philosophy employs a mixture of modes of assessment: exams and coursework in many different varieties including essays, oral presentations, dissertations, exercises, and supported independent work (eg in the placement module).

Liverpool Hallmarks
