

UFOs

Unidentified Flying Objects

Are there any images that need an extraterrestrial explanation?

Dr Steve Barrett LTU3A 16 Jan 2025

Statistics Don't Lie

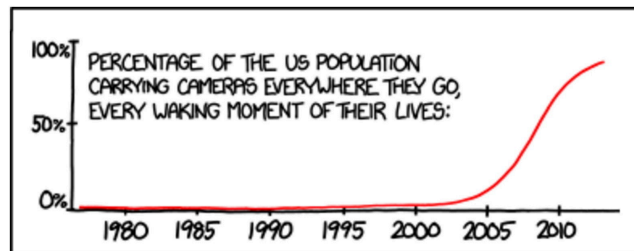

Have extraterrestrial aliens visited Earth? ✓ 40%

Are extraterrestrial aliens visiting *now*? ✓ 35%

That's less than the number who believe in ghosts (60%)
but greater than telekinesis (25%)
or Bigfoot (20%)

[... or evolution (31%)]

UFOs? Isn't It Now Settled?

IN THE LAST FEW YEARS, WITH VERY LITTLE FANFARE, WE'VE CONCLUSIVELY SETTLED THE QUESTIONS OF FLYING SAUCERS, LAKE MONSTERS, GHOSTS, AND BIGFOOT.

No, It's Not Settled

Google hits for "UFO" > 250 million

This implies that, despite so many cameras, it's *not* settled

UFO images could be ...

- Manmade Objects
- Natural Objects
- Image Artefacts
- Deliberately Faked
- Extraterrestrial Spacecraft

UFOs

Definitions and Claims

I will conform to the conventional usage of the acronym UFO to mean an object observed in the sky that is not readily identified.

Regarding an extraterrestrial origin, I side with Carl Sagan:

"Extraordinary claims require extraordinary evidence"

Another useful tool for a rational scientist is Occam's Razor:

"If there are two explanations for an observation, then the one that requires the least speculation is usually better"

or

"Simpler solutions are more likely to be correct than complex ones"

Reliable Information

Ideal UFO

... clear, detailed, in focus, no camera shake, well-exposed ...

Typical UFO

... blurred, out of focus, camera movement, over-exposed ...

Space Jellyfish

Who could see this
and not think ...

UFO!

13

The image shows a bright, glowing, jellyfish-like object in the night sky, with a cityscape visible in the background. The object has a central bright spot and a long, wispy tail.

Falcon Tails

UNIVERSITY OF LIVERPOOL

14

The image shows two people standing on a beach at night, looking up at a bright, glowing object in the sky that resembles a comet or a meteor with multiple tails. The object is positioned in the upper left quadrant of the frame.

Falcon Nebula

BRIAN B. HALDET, 2018

UNIVERSITY OF LIVERPOOL

15

The image shows a complex, multi-colored nebula in space, with a bright central region and several distinct, glowing structures. The colors range from blue and purple to red and orange.

Rocket Trails

Seay Photography

UNIVERSITY OF LIVERPOOL

16

The image shows a series of bright, glowing trails in the night sky, resembling rocket trails or a comet's tail. The trails are multi-colored and form a complex, looping pattern. The background is dark with some stars visible.

A Good Year For UFOs

"Super Clear" Footage

YouTube Videos

One YouTube video in particular piqued my interest ...

"Puerto Rico's close proximity to [the Bermuda Triangle] may explain why it's a known hotbed for UFOs.

There have been countless UFO sightings over the years, but many experts consider this next piece of footage the Gold Standard."

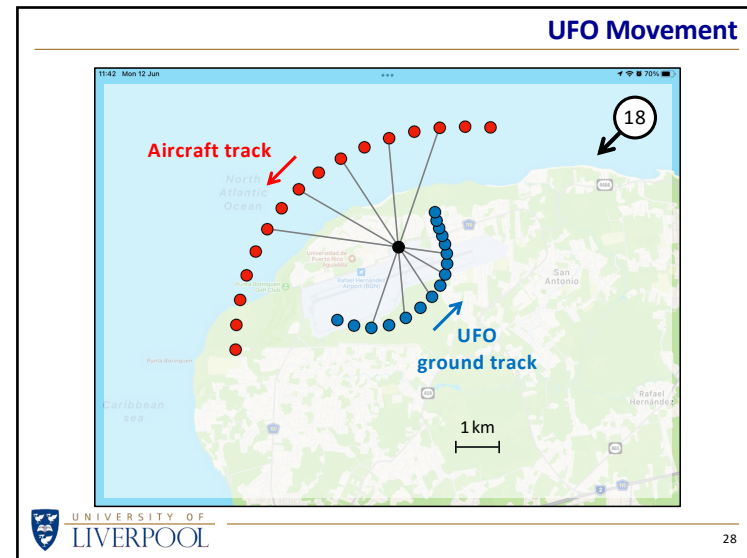

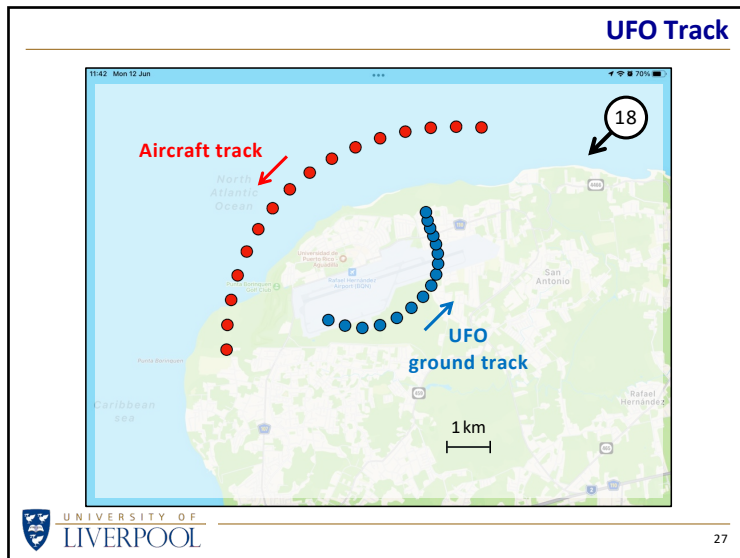

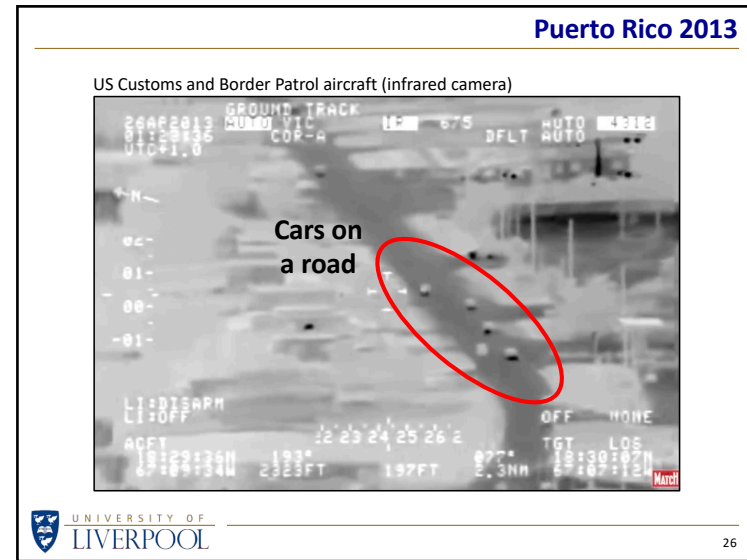

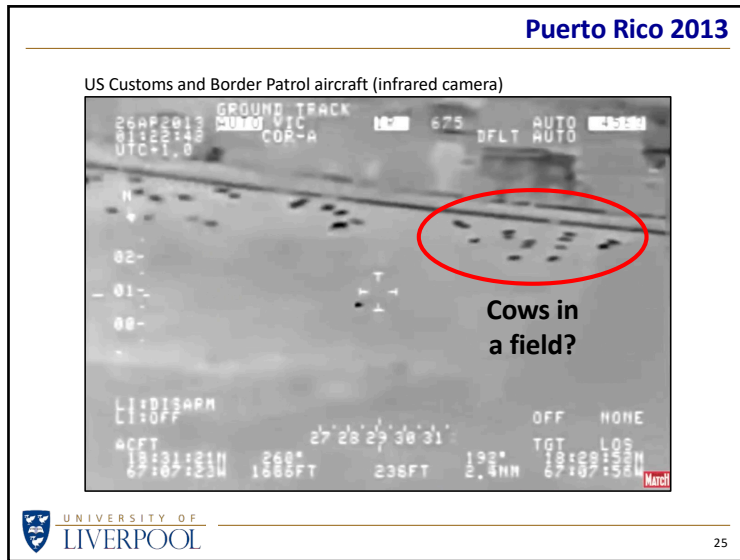

Does this 'Gold Standard' for UFO sightings stand up to scrutiny?

Puerto Rico 2013

US Customs and Border Patrol aircraft (infrared camera)

UFOs

UFOs

Occam's Razor

"Of countless UFO sightings, many experts consider this the Gold Standard."

The YouTube description:

A metallic orb ...
... moving at incredible speed
... with no obvious propulsion
... into a 18mph headwind

The infrared camera sees an object that "does not match anything we know of".

An alternative explanation:

The object is essentially static

It is drifting slowly downwind

It is probably a balloon

Extraterrestrials?

The lack of evidence for extraterrestrial UFOs leads to a question ...

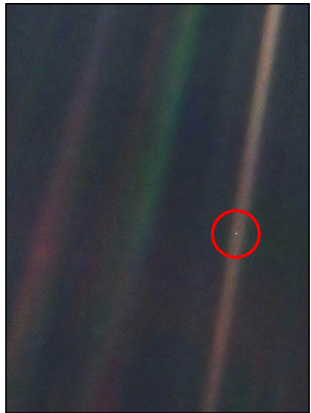

The number of stars in the Milky Way	≈	300 billion
Most have planetary systems	÷ 2 ⇒	150 billion
Quite a few planets are Earth-like	÷ 3 ⇒	50 billion
Life may have originated	÷ 100 ⇒	500 million
Complex life may have evolved	÷ 100 ⇒	5 million
Intelligent life may have evolved	÷ 100 ⇒	50 thousand

So if the galaxy is full of civilisations – **Where are they?**

UNIVERSITY OF LIVERPOOL

58

Extraterrestrials?

"Look again at that dot. That's here. That's home. That's us. On it ... every human being who ever was, lived out their lives ...

– on a mote of dust suspended in a sunbeam."
